### Back to Basics

.All Essential for Life Products produced at Yumwija derived from plants communities flourishing here at Yumwija. Our essentials are made from wildcrafted plants living in nature. These wildcrafted plants are not cultivated plants so they keep all the original quality derived from thriving with Nature. They have superior healing abilities than commercial produced products.. The plants keep their healing abilities for re hydrating the organs including the mind for indigenous peoples because we need organ hydration to stay young and have good strong health. Our indigenous healing remedy's are not commonly available on the market Why, because it is so readily available around us if indigenous people returned to using our Earth plants as our medicine, our progression of illness leading to death would be halted. Once again the Nature of the Earth, the will of life would rebound in all of us and we

Liquid Clay  
Yumwija Honey

would be free of their death over our life. We forget we are a part of the creation of Earth, all species on the Earth know how to heal themselves.

### Life supports Life

Many people today still go to doctors especially Sisters and take whatever poison they are told. Then complain about their ill health. If you have any doubts on why you are losing your health read Medical Apartheid, Deadly Monopolies both by Harriet A Washington, In Defense of Food by Michael Pollan. For the last 15 years our food sources have become more artificial and genetically altered foods <http://www.disabled-world.com/fitness/gm-foods.php>. Selling foods that are genetically altered as organic is even done by Whole Foods Markets [www.infowars.com/whole-foods-knowingly-engages-in-massive-gm...](http://www.infowars.com/whole-foods-knowingly-engages-in-massive-gm...)

In the United States GMO's have infiltrated over 85% of the foods available to our people living in the U.S. alone The Earth currently supports the life of billions of people. Prophecy of the new world order, claims in order for the new world order to be successful the Earth population must be reduced to 500 million people. ( The Georgia Stonehenge proclaims <http://www.stopagenda21inms.com/index.php?/What-is-Agenda-21/the-georgia-guidestones.html> ) Genocide through our foods is how the new world order will be implemented as a result There will only be one race of people on our Earth, it won't be our people if we do not stop following the white mans doctrine, we will have a permanent grave without a future or home on Earth. extinction is not pretty.

Sisters please stop getting mammograms, they are cancer causing, if you don't have breast cancer you will. Removing our breast is a way of female castration upon us. If we promote natural breast feeding to our daughters we would have no form of breast cancer. Lumps in our breast are natural. I now of 5 Sisters who were told they had breast cancer and found out they did not have any form of cancer, but they tricked into allowing someone to remove their breast. Living without your breast is Cancer
